New Phase of Cleaner Production Partnership Programme (2020-2025)

Demonstration project: A15-Installation of ultraviolet (UV) printing and curing machine to replace conventional solvent-based printing machine to reduce VOC emissions (printing and publishing industry)

Background

In 2008, the HKSAR Government launched the Cleaner Production Partnership Programme (the Programme) to encourage and facilitate Hong Kong-owned factories in Hong Kong and Guangdong to adopt cleaner production technologies and practices, thereby contributing to improving the environment. In the light of the significant environmental benefits and positive industry response brought by the Programme, the HKSAR Government has extended the Programme until 2025 with an additional funding of HK\$311 million.

This visit will showcase a demonstration project of 佛山市順德區匯達電路板有限公司. The demonstration project is "A15 - Installation of ultraviolet (UV) printing and curing machine to replace conventional solvent-based printing machine to reduce VOC emissions." will be detailed explained including its technical principles, on-site equipment operations and effectiveness.

Date and Time	10 July 2024 14:30-16:00
Location	佛山市順德區匯達電路板有限公司 *(地址: 佛山市順德區勒流鎮新啟工業區) (Foshan, Mainland)
Language	Putonghua and Cantonese

*Participants are responsible for arranging their own transportation.
