

Professional Scrum FutureSkills Series

We are living with emerging technologies like mobile, internet of things, artificial intelligence and machine learning that contribute to the rapidly changing markets with new products, competitors and regulations. Scrum is a framework for developing, delivering, and sustaining complex products. It is the approach we can use to address complex adaptive problems while efficiently and creatively delivering products of the highest possible value.

HKPC collaborates with Scrum HK to provide a series of certification training on scrum masters, product owners, user experience and DevOps to help IT professionals and HK enterprises to better equip their businesses and departments for agile transformation.
