

Traditional Chinese Medicine in the New Industrialisation Era: Opportunities, Challenges, and Strategic Pathways

Generated by Generated AI, this content was supervised and reviewed by humans

As the Traditional Chinese Medicine industry enters a pivotal transformation era, staying ahead requires blending age-old tradition with modern industrial technology. This exclusive, free seminar brings together experts from HKPC to guide startups, local representatives, and manufacturers through the modern TCM landscape. Discover how smart manufacturing, strict quality standards, and dedicated government funding can accelerate your business growth and propel your TCM products from concept to global market ready.
