

Seminar on Revolutionising Textiles: The Potential of Bio-based Nylon in Sustainable Design

19 Jul 2024 (FRI)
15:00 - 17:00

Venue: Theatre 2, 1/F, HKPC Building, 78 Tat Chee Avenue, Kowloon, Hong Kong

Language: Mandarin and Cantonese

Seminar Overview

The demand for eco-friendly options in the textile industry is currently at an all-time high. Bio-based nylon stands out as a frontrunner for sustainability.

Join us to explore its transformative potential for textiles.

In this seminar, we will highlight the benefits of bio-based nylon, ranging from sustainability to functionality. Participants will gain valuable insights into its innovative applications and practical advantages for designers, manufacturers and consumers.
