VIVATECH

17-20 JUNE 2026 / PARIS

## Introduction

Slovakia automotive industry combines strong current advantages with a clear future path. It benefits from world-leading car production per capita, a skilled and cost-competitive workforce, a dense supplier base, and major OEMs including Volkswagen, Stellantis, Kia, and Jaguar Land Rover. Building on this foundation, the industry is transitioning toward electromobility, batteries, automation, and Intelligent Manufacturing with suppliers moving into higher value-added activities such as R&D and electronics, positioning Slovakia as a key hub for Europe's next-generation electric mobility.

Serbia's automotive industry is undergoing rapid modernization, driven by accelerating foreign investment and robust export growth, which strengthen Serbia's strategic position within the European automotive value chain.

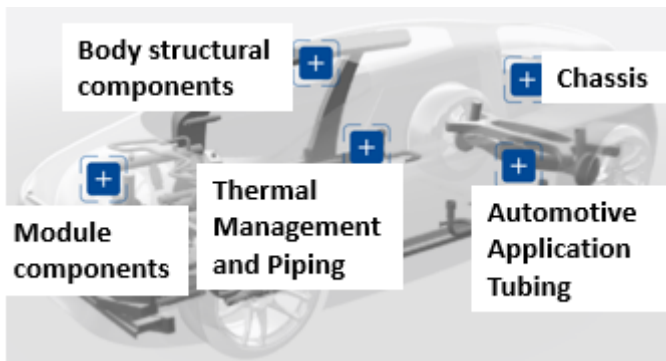

VivaTech, Europe's leading technology and startup exhibition, upholds its mission to advance the frontiers of technology and business. It convenes global industry leaders, corporations, investors, and innovators, with a focused agenda on breakthrough technologies, strategic partnerships, and emerging innovation trends.

**SARIO**  
SLOVAK INVESTMENT AND TRADE DEVELOPMENT AGENCY

SARIO is the official government agency of Slovakia. It acts as a one-stop shop for foreign investors and international partners, supporting investment, trade, and innovation, particularly in high-value sectors such as automotive, and advanced manufacturing.

**BENTELER**

BENTELER Slovakia is a **Tier-1 automotive supplier** specializing in metal-based components, modules, and advanced manufacturing solutions. It plays an important role in Slovakia's automotive, combining materials expertise, high-precision forming technologies.

Volkswagen is one of the largest and most important industrial companies in Slovakia, and one of the most important automotive plants in Central Europe.

**ctp** CTPark Trnava offers modern A-class production and warehouse facilities, designed for automotive, advanced manufacturing, and distribution.

**JLR** The company plays a strategic role in JLR's European manufacturing network and is being prepared for future electric vehicle production as part of JLR's long-term electrification strategy.

Sluzba Nitra is a Slovak Tier-1 and Tier-2 automotive supplier. The company specializes in the development and production of automotive electronics and lighting components, including fuse boxes, relay carriers, interior and exterior lighting, PCB assembly, and stamped parts.
